Subject Index to Volume 4

Acid rain (Tsai) 185
Acid rain (Tsai) 199
Acute toxicity (Couillard) 451
Acute toxicity (Liu) 463
Adaptations (Reynolds) 229
Aeromonas hydrophila (Flemming) 473
Alcalgenes eutrophus (Stenström) 405
Algal growth (Chen) 35
Algal toxicity tests (Chen) 35
Alkaline phosphatase (Burton) 149
Alkaline phosphatase (Xu) 105
Alkaloid toxins (Codd) 499
Anabaena (Sivonen) 339
Anabaena spp. (Codd) 499
Anatoxin-a (Sivonen) 339
Antibiotic resistance (Seyfried) 437
Antibiotic-resistant bacteria (Rosenberg) 281
Antibody production (Codd) 499
Aphanizomenon (Sivonen) 339
Artifical substrates (Henebry) 209
ATP measurement (Seyfried) 437
Atrazine (Stenström) 53

Bacteria isolation (Egli) 23
Bacterial growth (Adam) 363
Bacterial indicators (Seyfried) 317
Bacterial toxicity assay (Lenz) 43
Bacterial transport (Palmateer) 377
Bacterial turbidity (Adam) 363
Bacteriophage (Kupelian) 71
Basic-respiration rate (Stenström) 53
Bioassay (Flemming) 473
Bioassay (Stratton) 425
Bioassay organism (Couillard) 451
Bioassay procedure (Couillard) 451
Biochemical test (Liu) 399
Biodegradation kinetics (Liu) 115
Biodegradation process (Liu) 115
Biological activity (Stenström) 53
Biomass (Dougherty) 85
Biomass estimators (Pratt) 161
Blue-green algae (Falconer) 175
Brachionus calyciflorus (Couillard) 451
Brine shrimp test (Lenz) 43

Captan (Stratton) 425
Carbon dioxide fixation (Tsai) 185
Ceriodaphnia dubia (Burton) 149
Chemical mixture (Liu) 463
Chemical oxygen consumption (Flemming) 473
Chemical toxicity (Liu) 399
Chemostat enrichment culture (Egli) 23
Cigarette smoke condensate (Kupelian) 71
Coliform bacteria (Niemelä) 271
Coliform tests (Martins) 329
Coliphage test (Martins) 329
Colonization rates (Henebry) 209
Cometabolic biodegradation (Stenström) 405
Community bioassay (Henebry) 209
Community structure (Henebry) 209
Contaminated sediment (Ross) 1
Copper toxicity (Flemming) 473
Cup plate diffusion assay (Lenz) 43
Cyanobacteria (Reynolds) 229
Cyanobacteria (Sivonen) 339
Cyanobacterial blooms (Codd) 499
Cyanobacterial toxins (Codd) 499
Cyanobacterial toxins (Falconer) 175
Cylindrospermum (Sivonen) 339
Cytochrome reduction (Tsai) 185
Cytotoxicity testing (Codd) 499

Daphnia magna (Burton) 149
2,4-D decomposition (Stenström) 405
Degradation rate (Stenström) 53
Dehydrogenase (Burton) 149
Dehydrogenase activity (Liu) 399
Detergents (Egli) 23
2,3-dichlorophenol (Liu) 463
DNA transposition (Kupelian) 71
Domestic sewage (Gophen) 353
Drinking water quality (Martins) 329
Drinking water quality (Tobin) 257

EC_{50} (Chen) 35
Ecological communities (Smith) 129
Ecosystem properties (Pratt) 161
Ecotoxicological hazard (Ross) 1

Enterobacteriaceae (Niemelä) 271
Environment (Reynolds) 229
Environmental mutagens (Kupelian) 71
Environmental stress (Pratt) 161
Epidemiological survey (Seyfried) 317
Escherichia coli (Palmateer) 377
Eutrophication (Watanabe) 487

Factors affecting degradation (Liu) 115
Factors affecting degradation (Stenström) 405
Factors affecting toxicity (Chen) 35
Factors affecting toxicity (Stratton) 425
Fecal coliforms (Adams) 309
Fecal coliforms (Niemelä) 271
Fecal streptococci (Adams) 309
Fibroblast culture (Codd) 499
First-order kinetics (Stenström) 53
Fishpond wastes (Gophen) 353
Fungicide (Stratton) 425

β-galactosidase (Burton) 149
β-galactosidase (Xu) 105
Genotoxic agents (Kupelian) 71
Genotoxicity testing (Xu) 105
Giardia removal (Tobin) 257
β-Glucosidase (Burton) 149
Gomphosphaeria (Sivonen) 339
Ground water (Dougherty) 85
Growth inhibition assay (Lenz) 43

Half-life (Stenström) 53
Hazard evaluation (Henebry) 209
Heavy metals' toxicity (Cowillard) 451
Heavy metal toxicity (Seyfried) 437
Hepatotoxicity (Sivonen) 339
Heptapeptide toxins (Watanabe) 487
Herbicide decomposition (Stenström) 53
Heterotrophic species (Henebry) 209
HPTLC (Codd) 499
H_2S paper strip test (Martins) 329
Hydraulic exchange rate (Johnstone) 295

Immunoassays (Codd) 499
Indicator bacteria (Johnstone) 295
Indicator bacteria (Niemelä) 271
Industrial effluent (Seyfried) 437
In situ test (Henebry) 209
Interaction responses (Stratton) 425

Kinetics of decomposition (Stenström) 405
Klebsiella pneumoniae (Seyfried) 437

Laboratory ecosystems (Pratt) 161
Lake Kinneret (Gophen) 353
LD_{50} of heptapeptide toxins (Watanabe) 487
Linuron (Stenström) 53

M. aeruginosa (Watanabe) 487
M. viridis (Watanabe) 487
Mammalian toxicity tests (Lenz) 43
Mathematical model (Chen) 35
Maximum growth rate (Adam) 363
Membrane filtration method (Niemelä) 271
Mercuric chloride (Liu) 463
Mesocosm (Smith) 129
Mesocosms (Pratt) 161
Metals toxicity (Tsai) 185
Method for detection (Codd) 499
MF Endo coliform test (Martins) 329
Microbial activity (Burton) 149
Microbial activity (Dougherty) 85
Microbial adaptation (Liu) 115
Microbial communities assay (Ross) 1
Microbial community (Burton) 149
Microbial community (Dougherty) 85
Microbiological quality (Rosenberg) 281
Microbiological test (Martins) 329
Microcosm (Smith) 129
Microcosms (Dougherty) 85
Microcosms (Pratt) 161
Microcystis (Sivonen) 339
Microcystis species (Watanabe) 487
Microsystis aeruginosa (Codd) 499
Microtox test (Ross) 1
Mineral water quality (Rosenberg) 281
Mobile genetic elements (Kupelian) 71
Mountain watershed (Adams) 309
Mouse bioassay (Codd) 499
Multispecies experiment (Smith) 129
Mu transposase (Kupelian) 71

Natural selection (Reynolds) 229
Net oxygen production (Pratt) 161
Neurotoxicity (Sivonen) 339
Nitrilotriacetic acid (NTA) (Egli) 23
Nitrite oxidation (Tsai) 199
Nitrobacter agilis (Tsai) 185
Nitrobacter agilis (Tsai) 199
NTA degradation (Egli) 23

Organic pesticides (Stenström) 405
Organic pollutants (Dougherty) 85
Oscillatoria (Sivonen) 339
Oxygen consumption (Flemming) 473
Oxygen uptake (Tsai) 185
Oxygen uptake (Tsai) 199
Ozonation (Adam) 363

Panagrellus redivivus test (Ross) 1
Pathogenic bacteria (Gophen) 353
Pentachlorophenol (Liu) 463
Pentachlorophenol biodegradation (Liu) 115
Pentachlorophenol toxicity (Seyfried) 437
Peptide toxin (Codd) 499
Percentage inhibition (Liu) 399
Photobacterium phosphoreum test (Lenz) 43
Pigment synthesis inhibition assay (Lenz) 43
Plankton (Reynolds) 229
Planktonic rotifer (Couillard) 451
Plasmid (Kupelian) 71
Plasmid profile (Seyfried) 437
Plate count (Adam) 363
Population dynamics (Reynolds) 229
Presence/Absence coliform test (Martins) 329
Primary production (Pratt) 161
Pristine waters (Niemelä) 271
Process-level parameters (Henebry) 209
Production ecology (Reynolds) 229
Protozoan communities (Henebry) 209
Protozoan species richness (Pratt) 161
Pseudomonas aeruginosa (Seyfried) 317
Pseudomonas species (Rosenberg) 281
Public health risk (Falconer) 175
Pythium ultimum (Stratton) 425

Regrowth (Adam) 363
Reservoir water quality (Johnstone) 295
Respiration rate (Flemming) 473

Screening test (Ross) 1
Sediment elutriate (Henebry) 209
Sediment sample (Flemming) 473
Sediment toxicity test (Burton) 149
Selenastrum capricornuthum test (Ross) 1
Selenastrum capricornutum (Burton) 149
Single-species bioassay (Henebry) 209
Single-species bioassay (Ross) 1
Slow sand filter (Adam) 363
SOS chromotest (Xu) 105
Species composition of *Microcystis* (Watanabe) 487
Statistical analysis (Smith) 129
Statistical design (Smith) 129
Storage effect (Rosenberg) 281
Stream bacteriology (Adams) 309
Stream parameter (Burton) 149
Stream pollution (Palmateer) 377
Stream response (Pratt) 161
Stream sediment (Palmateer) 377
Structure of heptapeptide toxins (Watanabe) 487
Subsurface soils (Dougherty) 85
Sulfooxyanion (Tsai) 199
Surface water (Liu) 399
Swarming inhibition assay (Lenz) 43
Swim water quality (Johnstone) 295
Swimming pools (Seyfried) 317
Synergistical response (Stratton) 425

Temperature (Johnstone) 295
Time lag effect (Smith) 129
Toxicant effect (Pratt) 161
Toxicant effect (Smith) 129
Toxicant interaction (Stratton) 425
Toxic chemical (Liu) 399
Toxic cyanobacteria (Falconer) 175
Toxicity mechanism (Couillard) 451
Toxicity response (Liu) 463
Toxicity screening (Xu) 105
Transposase gene expression (Kupelian) 71
Turbidity (Johnstone) 295

Variability in biodegradation (Egli) 23

Waterborne illness (Tobin) 257
Water microbiology (Tobin) 257
Water quality (Adam) 363
Water quality (Palmateer) 377
Water quality index (Johnstone) 295
Water quality management (Gophen) 353
Water quality parameters (Seyfried) 317
Water quality standard (Gophen) 353
Water runoff (Gophen) 353
Water treatment (Falconer) 175
Water treatment devices (Tobin) 257
